782100 Series

PE22100 Compatible Converter Transformers

FEATURES

- pSemi PE22100 compatible
- 3.3V and 5V versions
- Isolation tested to 4kVDC
- Toroidal construction
- Low profile
- Industry-standard pinout
- UL 94 V-0 package materials
- Industrial temperature range
- J-STD-020D reflow (SM versions)
- RoHS compliant
- Backwards compatible with Sn/Pb soldering systems

DESCRIPTION

The 782100 series of converter transformers are specifically designed for use with the pSemi PE22100 chip set to provide isolated power supplies for transceivers in isolated interface applications.

SELECTION GUIDE

Order Code	Input Voltage	Output Voltage	Isolation[2] Voltage	Turns Ratio	Package Type
	V	V	VDC		
Discontinued					
782100/33VC	3.3	3.3	4000	1CT:1.33CT	DIL
782100/53VC	5	3.3	4000	1.14CT:1CT	
782100/35JVC	3.3	5.0	4000	1:2.14	SM
782100/55JVC	5.0	5.0	4000	1:1.33	

ORDER CODE DETAILS

Order Code	Package Type	Packaging Type	Quantity
782100/XX(J)VC	6 Pin (SM) / DIL	Tube	50
782100/XXJVC-R	6 Pin SM	Tape & Reel	500

782100/33VC CHARACTERISTICS

Parameter	Conditions	Min.	Max.	Units
Primary Inductance, L_P[1]	100kHz, 20mV	190	310	µH
Leakage Inductance, L_L[1]	100kHz, 250mV		8	µH
Inter winding Capacitance, C_{WW}	100kHz, 250mV		11	pF
Primary D.C. Resistance, R_{DC}[1]	<0.1VDC		600	mΩ
Volt-time Product, Et	Pins 1/2 or 2/3	13		Vµs

782100/53VC CHARACTERISTICS

Parameter	Conditions	Min.	Max.	Units
Primary Inductance, L_P[1]	100kHz, 20mV	150	260	µH
Leakage Inductance, L_L[1]	100kHz, 250mV		8	µH
Inter winding Capacitance, C_{WW}	100kHz, 250mV		8	pF
Primary D.C. Resistance, R_{DC}[1]	<0.1VDC		600	mΩ
Volt-time Product, Et	Pins 1/2 or 2/3	13		Vµs

782100/35JVC CHARACTERISTICS

Parameter	Conditions	Min.	Max.	Units
Primary Inductance, L_P[1]	100kHz, 20mV	110	203	µH
Leakage Inductance, L_L[1]	100kHz, 250mV		5	µH
Inter winding Capacitance, C_{WW}	100kHz, 250mV		8	pF
Primary D.C. Resistance, R_{DC}[1]	>0.1VDC		600	mΩ
Volt-time Product, Et	Pins 1/2 or 2/3	18		Vµs

782100/55JVC CHARACTERISTICS

Parameter	Conditions	Min.	Max.	Units
Primary Inductance, L_P[1]	100kHz, 20mV	170	335	µH
Leakage Inductance, L_L[1]	100kHz, 250mV		8	µH
Inter winding Capacitance, C_{WW}	100kHz, 250mV		8	pF
Primary D.C. Resistance, R_{DC}[1]	>0.1VDC		600	mΩ
Volt-time Product, Et	Pins 1/2 or 2/3	25		Vµs

RoHS COMPLIANT

For full details go to https://www.murata.com/en-global/products/power/rohs

All specifications typical at T_A=25°C

1. L_P, L_L and R_{DC} measured between pins 1-3.
2. Flash tested for 1 second

ABSOLUTE MAXIMUM RATINGS	
Operating free air temperature range	-40°C to 85°C
Storage temperature range	-50°C to 125°C

VC VARIANTS SOLDERING INFORMATION	
Pin finish	Matte tin
Peak wave solder temperature	260°C for 10 seconds

JVC VARIANTS SOLDERING INFORMATION	
Pin finish	Matte tin
Max. peak reflow temperature	245°C
Moisture sensitivity level[3]	1
Max. time above liquidous (217°C)	100s

TECHNICAL NOTES

ISOLATION VOLTAGE

'Hi Pot Test', 'Flash Tested', 'Withstand Voltage', 'Proof Voltage', 'Dielectric Withstand Voltage' & 'Isolation Test Voltage' are all terms that relate to the same thing, a test voltage, applied for a specified time, across a component designed to provide electrical isolation, to verify the integrity of that isolation.

All products in this series are 100% production tested at their stated isolation voltage.

A question commonly asked is, "What is the continuous voltage that can be applied across the part in normal operation?"

For a part holding no specific agency approvals both input and output should normally be maintained within SELV limits i.e. less than 42.4V peak, or 60VDC. The isolation test voltage represents a measure of immunity to transient voltages and the part should never be used as an element of a safety isolation system. The part could be expected to function correctly with several hundred volts offset applied continuously across the isolation barrier; but then the circuitry on both sides of the barrier must be regarded as operating at an unsafe voltage and further isolation/insulation systems must form a barrier between these circuits and any user-accessible circuitry according to safety standard requirements.

REPEATED HIGH-VOLTAGE ISOLATION TESTING

It is well known that repeated high-voltage isolation testing of a barrier component can actually degrade isolation capability, to a lesser or greater degree depending on materials, construction and environment. This series has toroidal isolation transformers, with no additional insulation between primary and secondary windings of enamelled wire. While parts can be expected to withstand several times the stated test voltage, the isolation capability does depend on the wire insulation. Any material, including this enamel (typically polyurethane) is susceptible to eventual chemical degradation when subject to very high applied voltages thus implying that the number of tests should be strictly limited. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage.

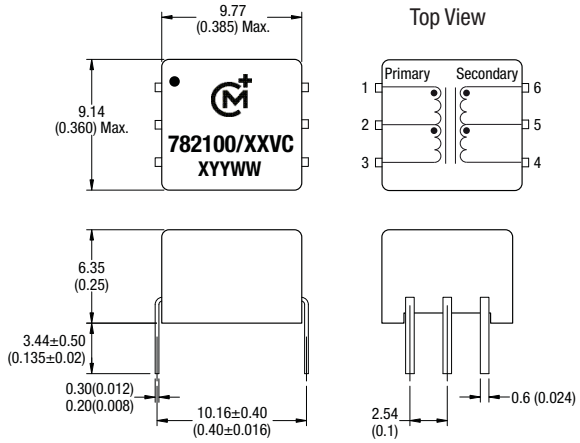

This consideration equally applies to agency recognised parts rated for better than functional isolation where the wire enamel insulation is always supplemented by a further insulation system of physical spacing or barriers.

3. Representative samples of the product were subjected to the conditioning described in IPC/JEDEC J-STD-020D and passed electrical testing, package coplanarity and visual inspection which revealed no external cracks or changes in package body flatness.

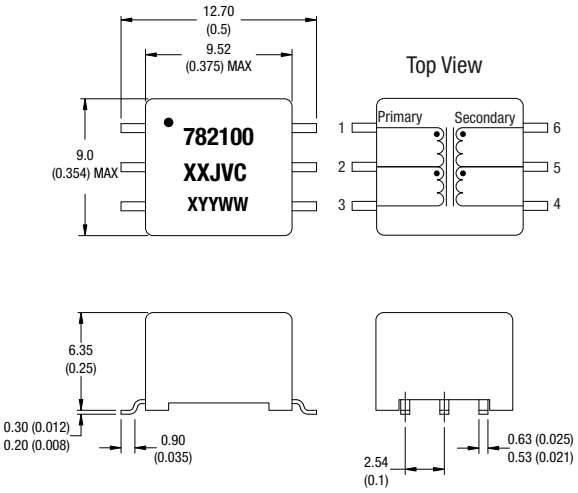

PACKAGE SPECIFICATIONS

MECHANICAL DIMENSIONS

DIL Package

SM Package

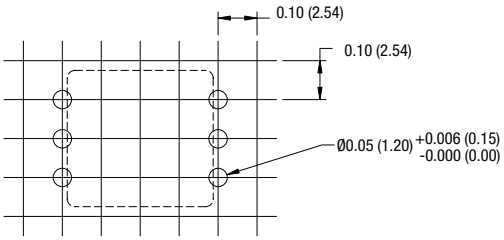

Unless otherwise stated all dimensions in mm (inches) ± 0.25 (0.01). All pins on a 2.54 (0.1) pitch and within ± 0.25 (0.01) of true position.

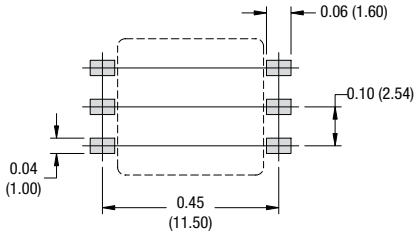

Package weight: 1.1g Typ.

RECOMMENDED FOOTPRINT DETAILS

VC Versions

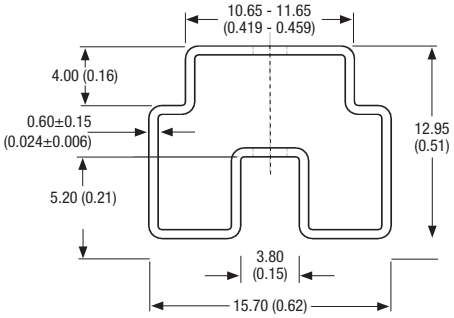

JVC Versions

Unless otherwise stated all dimensions in mm (inches) ± 0.25 (0.01). All pins on a 2.54 (0.1) pitch and within ± 0.25 (0.01) of true position.

TUBE OUTLINE DIMENSIONS

Tube material: Antistatic coated clear pvc

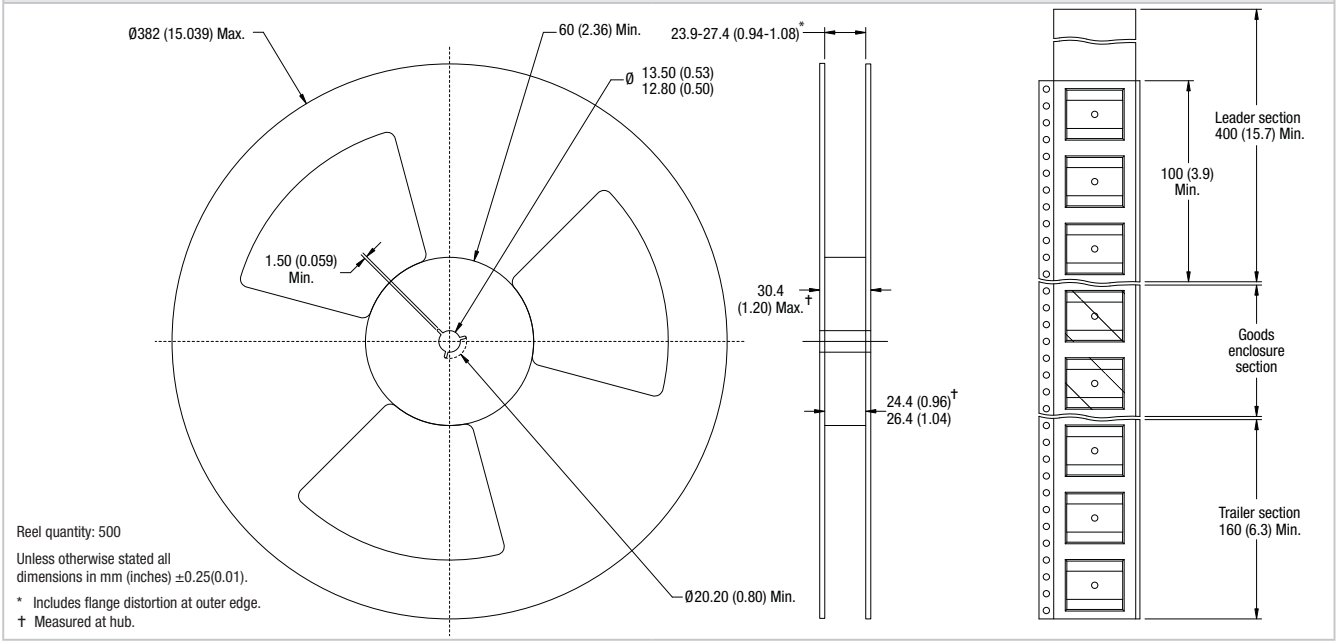

Unless otherwise stated all dimensions in mm (inches) ±0.25 (0.01).

Tube length: 500±2 (19.7±0.08)

Tube quantity: 50

TAPE & REEL SPECIFICATIONS

REEL OUTLINE DIMENSIONS

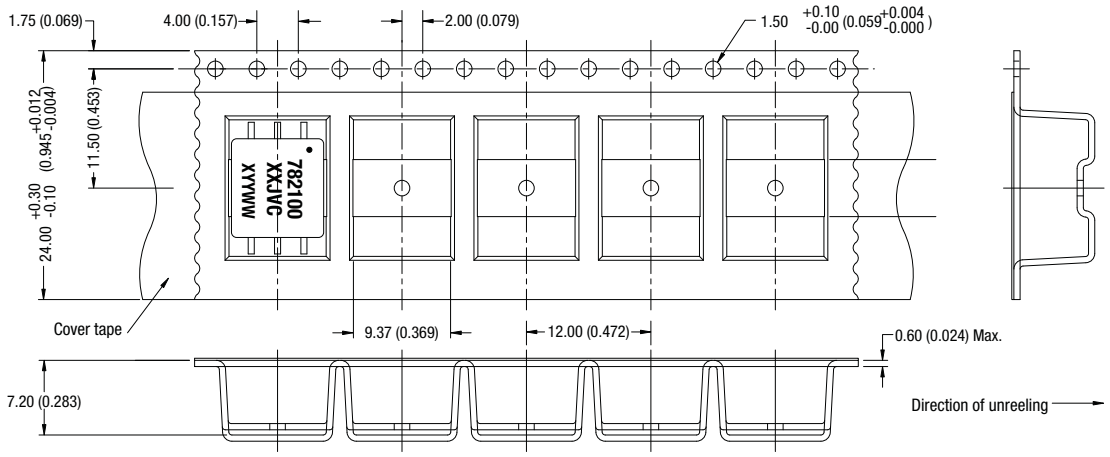

Reel quantity: 500

Unless otherwise stated all dimensions in mm (inches) ±0.25(0.01).

* Includes flange distortion at outer edge.
† Measured at hub.

TAPE OUTLINE DIMENSIONS

Unless otherwise stated all dimensions in mm (inches) ±0.25(0.01).

DISCLAIMER

Unless otherwise stated in the datasheet, all products are designed for standard commercial and industrial applications and NOT for safety-critical and/or life-critical applications.

Particularly for safety-critical and/or life-critical applications, i.e. applications that may directly endanger or cause the loss of life, inflict bodily harm and/or loss or severe damage to equipment/property, and severely harm the environment, a prior explicit written approval from Murata is strictly required. Any use of Murata standard products for any safety-critical, life-critical or any related applications without any prior explicit written approval from Murata shall be deemed unauthorised use.

These applications include but are not limited to:

- Aircraft equipment
- Aerospace equipment
- Undersea equipment
- Power plant control equipment
- Medical equipment
- Transportation equipment (automobiles, trains, ships, etc.)
- Traffic signal equipment
- Disaster prevention / crime prevention equipment
- Data Processing equipment

Murata makes no express or implied warranty, representation, or guarantee of suitability, fitness for any particular use/purpose and/or compatibility with any application or device of the buyer, nor does Murata assume any liability whatsoever arising out of unauthorised use of any Murata product for the application of the buyer. The suitability, fitness for any particular use/purpose and/or compatibility of Murata product with any application or device of the buyer remain to be the responsibility and liability of the buyer.

Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards that anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm, and take appropriate remedial actions. Buyer will fully indemnify and hold Murata, its affiliated companies, and its representatives harmless against any damages arising out of unauthorised use of any Murata products in any safety-critical and/or life-critical applications.

Remark: Murata in this section refers to Murata Manufacturing Company and its affiliated companies worldwide including, but not limited to, Murata Power Solutions.

Murata Power Solutions (Milton Keynes) Ltd. makes no representation that the use of its products in the circuits described herein, or the use of other technical information contained herein, will not infringe upon existing or future patent rights. The descriptions contained herein do not imply the granting of licenses to make, use, or sell equipment constructed in accordance therewith. Specifications are subject to change without notice.
